During last two years, Dupuytren Contracture (DC) treatment has gained increasing attention due to the diffusion of new therapeutics options, alternative to traditional surgery. To date scientific literature is lacking of uniform data about recurrence rate and complications of PNF: actually does not exist any consensus about the definition of recurrence for DC. Many papers on this topic present limited follow up and do not identify a replicable method to compare different surgical techniques results. An International Scientific Committee has prepared a Delphi questionnaire that has been sent to a selected panel of expert. Consensus conference will be organized in Rome on 22th April to:
• validate and analyze statistical Delphi results.
• draw out a Consensus Paper to publish on a selected scientific journal.

Faculty

Nicola Felici coordinator | Italy
Roberto Adani | Italy
Franco Bassetto | Italy
Massimo Ceruso | Italy
Miguel Cuadros | Spain
Alexandru Georgescu | Rumania
Riccardo Giunta | Germany
Guglielmo Lanni | Italy
Caroline Leclercq | France
Augusto Marcuzzi | Italy
Haerle Max | Germany
Giorgio Pajardi | Italy
Sandra Pfanner | Italy
Gary Pess | USA
Zsolt Szabo | Hungary
Erik T. Walbeehm | Holland

Preliminary program

09.00 Opening and introductory remarks | Pajardi – Marcuzzi
09.20 Up to date on Dupuytren Contracture Recurrence Concept | Ceruso
09.50 Dupuytren Contracture Recurrence Delphi Project: the story | Felici
10.10 Dupuytren Contracture Recurrence Project: results Consensus on need for defining recurrence | Giunta
10.20 Consensus on concept of recurrence applied to Tubiana staging system | Leclercq
10.40 coffee break
11.00 Consensus on concept of recurrence applied to single joints | Georgescu
11.20 Consensus on concept of recurrence applied to digital rays | Pfanner
11.40 Discussion | Bassetto – Haerle
12.10 Presentation of Dupuytren on-line Registry | Walbeehm
12.25 The ultimate definition of Dupuytren Contracture Recurrence | Szabo
12.45 Discussion and definitive vote | Cuadros
13.15 Closing remarks | Adani – Felici
